

Cell Review

Cell Membrane = gate/fence
around the cell.
(lipid bilayer)

Nucleus = control center of cell.

DNA = recipe for proteins

Endoplasmic Reticulum =
conveyor belt that
carries proteins

Ribosomes = workers putting
together (assembling)
proteins

Golgi = packages the completed
protein

Vesicle = delivery truck carrying
protein

Mitochondria = energy provider
to entire cell.

Lysozome = garbage truck,
gets rid of waste.

Cell Theory

- ① All living organisms are made of CELLS.
- ② Cells are the basic unit of all living things.
- ③ All cells (life) come from pre-existing cells.
